OUR PROGRAM
The Integrative human sciences degree offers a dynamic approach to studying the well-being of individuals, families and communities in a global environment. Our core curriculum provides students a foundation to better understand human behavior within context and apply the knowledge and skills they are learning to real-world situations. In addition to the core coursework, students work with their advisor to select four areas of concentration specific to their own personal and professional goals. Three areas within the college and one is outside of the college. Concentration areas could include: community health, fashion studies, hospitality management, food science & industry, global food systems, Spanish, and more. An internship is embedded in the coursework, and students are encouraged to consider education abroad experiences.

This degree may lead to licensure in family and consumer sciences education in the State of Kansas.

PROGRAM HIGHLIGHTS
Internship experience • Professional mentoring program • Dedicated student organizations • Education abroad opportunities • Tailored curriculum specific to your goals and interests • Certification and licensure opportunities

POTENTIAL CAREER OPPORTUNITIES
• Registered Nurse
• Extension Agent

120 hours are required for degree completion. The College of Health and Human Sciences requires a "C" or higher in Professional Studies courses, and the K-State 8 requirements must be met. Students wanting to pursue licensure in Family and Consumer Sciences Education will work with their advisor to pursue the plan of required courses that will meet Kansas state licensure standards.
