Now that you have Objectives and Action Steps for each supporting practice within the Resident Use Space core,

- Go back to your action plan and have members volunteer to take the lead on the action steps and write/type their name as Responsible person. Work to spread out the work load among the team.
- Go through and identify deadlines for each action step. Get the person that volunteered to lead the step involved in setting the date. Write this as the target date on the plan.
- Review the action plan to make sure it makes sense, and compare the timeline with the other cores you are working on. Try not to overload your schedule with too many activities at one time.
- Once the plan is complete, turn it in to the KSU Center on Aging for feedback and get started on your plan. The feedback you will receive from KSU are suggestions to aid in your success in the program. You do NOT need to submit any changes or revisions you make to the action plan. Make changes internally and continue using the plan as a working document.
- The feedback you will receive on your action plan has no impact on your PEAK 2.0 level but a submitted action plan is required for receipt of your Medicaid financial incentive. We see a strong
correlation between homes that invest time in the action planning process and success at evaluation time. Feel free to contact the PEAK 2.0 team anytime for consultation on your work.
