

MOVING IN: PERSONALIZING YOUR SPACE

(INSERT HOME NAME) is home to those who live here. It is important to us that you feel comfortable here and make the space your own. As you move-in we will work to support you in personalizing your room.

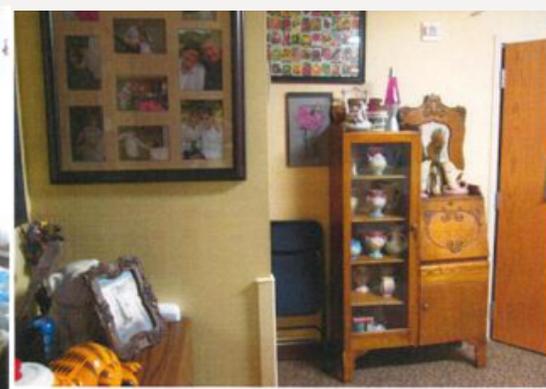

As you prepare to move-in and begin to pack, we encourage you to think about your favorite area in your current home. Where do you spend most of your time? What do you see as you look around? Are some of your favorite belongings in this area? Can you bring any of them with you?

If you have a favorite chair, table, lamp or other furniture will it fit in your room here? Our team can help with moving your furniture into the home. Though our rooms are furnished with a hospital bed, bedside table and straight chair, we are happy to remove these items to make space for your own furniture. Please talk with us if you are interested in bringing your own bed.

We can help you determine if your medical care can be accommodated in your personal bed or if a hospital bed will better meet your current healthcare needs. Do you have any favorite bedding? While we are happy to supply bedding, if you have favorite blankets, bedspreads, sheets or pillows, you are welcome to bring them along.

PHOTOS ARE EXAMPLES OF RESIDENTS' PERSONALIZED SPACES.

MOVING IN: PERSONALIZING YOUR SPACE

What color are the walls painted in your favorite room? We can have your bedroom painted a color of your choice at no extra charge to you.

Do you have any curtains or window coverings that will fit your window here? We will help with installation.

If you are moving into a semi-private room we will facilitate discussions about room décor with your new roommate and work to find solutions that satisfy both of you.

Look at your personal items and décor. We are happy to help hang shelves, art, pictures and other personal items to help you settle in.

We also want to help arrange your room in a way that will be most convenient to you. Do you need to lower your closet bar so you can reach your clothes? Would it help to move a mirror? We will look at the space with you to determine any changes that might help.

We realize this may have been a difficult decision and moving can be a challenging process. We are committed to helping you make this move as smooth as possible for you. Please contact us at (INSERT PHONE #) to discuss your plans and how we can help.

We look forward to welcoming you home!
